

FIRE FIGHTER, CERTIFICATE

The Fire Fighter Certificate is designed for students in the fire service and professionals in similar fields who have an interest or are currently employed in the field of fire science. Basic operations firefighter, building construction, and extinguishing and alarm systems are essential in today's fire service. After completion of the certificate, state certifications will be awarded through the Office of the State Fire Marshal (OSFM), if state requirements are met and state Certification Exams are passed. This certificate requires 24 credits in the courses listed below.

For more information about Fire Science, please visit the program of study page (<http://www.cod.edu/fire/>).
